FROM DIALOGUE TO ACTION

SOLUTIONS FOR PREVENTING MARINE LITTER IN THE CARIBBEAN SEA

COMMON SOLUTION MECHANISMS

National Dialogues brought together government, industry, civil society and academia in multi-day workshops in each country, not just to identify problems, but to prototype real solutions together. And despite developing their ideas independently, the same solution types kept emerging across the board:

- **Extended Producer Responsibility (EPR) Schemes**
- **Deposit Return Systems (DRS)**
- **Centralised Waste Authorities**
- **Community-led Engagement Models**
- **Education/ Curriculum Integration**

Each country's Output Paper goes more in depth on the challenges identified and the solutions co-created during its National Dialogue.
