

## WHAT IS THE PROMAR PROJECT?

PROMAR is a project funded by the German government, implemented from 2020 to 2026. We are dedicated to the prevention of marine litter in the Caribbean Sea, developing local action and policies instruments promoting the circular economy.

## OUR ALLIES

Overseen by adelphi and the German Ministry of the Environment, PROMAR coordinates the project activities with the governments of Colombia, Costa Rica, the Dominican Republic, the British Virgin Islands, Guyana, St. Kitts and Nevis, Suriname, and Trinidad and Tobago.

## OUR MISSION

Improved strategies, and contributions to international treaties, aiming at the reduction of plastics and marine litter.

Improved monitoring systems to create a better understanding and basis for policy decision-makers.

Increased awareness among stakeholders to induce widespread behavior change and to reduce marine litter

Showcase successful and sustainable local action against marine litter..

## COLLECTED TONS OF PLASTIC

## OUR PHASE II IMPLEMENTATION PARTNERS

The Institute of Marine Affairs (IMA) is a multi-disciplinary marine research organization in Trinidad & Tobago established in 1976. It conducts research, provides advice, and supports sustainable management of coastal and marine areas and resources

GHFS is a Surinamese environmental NGO working primarily in the field of coastal and marine resources since its inception in 2005. GHFS has implemented a marine spatial planning project and other coastal and marine interventions in Suriname.

The University of Guyana (UG), founded in October 1963, is celebrating its 60th anniversary. UG offers over 150 programs in various formats, including online, face-to-face, and blended learning, across eight campuses.

Green VI was founded in 2009 and is a non-profit organisation dedicated to the environment in the British Virgin Islands. Their vision is a green, clean and healthy BVI that demonstrates a viable balance between natural resource conservation and development.

Clarence Fitzroy Bryant College, situated in St. Kitts and Nevis, is a renowned institution dedicated to higher education. Alongside its academic offerings, the college actively engages in environmental projects, demonstrating its commitment to sustainability and ecological awareness.

Part of UNEP administered Regional Seas Programmes. The Cartagena Convention is the only regional agreement of its kind allowing governments to work together to protect the economic and environmental sustainability of the region through improved management of coastal and marine resources.

## THE BLUE BOX TOOL

### Overall Project

- BlueBox - Tools, guidelines, tutorials and best practices for local action
- Compendium of learning materials
- Beach clean ups
- Trainings in recycling and Extended Producer Responsibility (EPR)
